Code demo

test

::::::::::::: {.columns} ::: {.column width="40%"} TeX Live is an easy way to get up and running with the TeX document production system. It provides a comprehensive TeX system with binaries for most flavors of Unix, including GNU/Linux, and also Windows. It includes all the major TeX-related programs, macro packages, and fonts that are free software, including support for many languages around the world. :::

It provides a comprehensive TeX system with binaries for most flavors of Unix, including GNU/Linux, and also Windows. It includes all the major TeX-related programs, macro packages, and fonts that are free software, including support for many languages around the world. ::: :::::::::::::

Here's some code:

```c
int main() {
  for(i=0;i<34;i++){
   printf("Hello World!");
  }
}
```
